

CASING

CLAIMS

1. A casing of an electrical appliance, especially a computer, having the following features:
 - a) at least one casing wall (1) has a recess (2) facing the inside of the casing,
 - b) the recess (2) is constructed with at least one ventilation opening (3),
 - c) the recess (2) is covered by a cover (4) on the outside at least in the area of the ventilation opening (3).
2. The casing according to claim 1, wherein the casing wall (1) and the cover (4) form a substantially flush surface.
3. The casing according to claim 1, which has a circumferential slit (5) between cover (4) and wall (1).
4. The casing according to claim 1 whose cover (4) is detachably affixed to the recess (2).
5. The casing according to claim 1, whose cover (4) has at least one cross-piece (6) which can be inserted in a corresponding fixing opening (7) of the recess (2).
6. The casing according to claim 1, whose cover (4) is circular.
7. The casing according to claim 1, whose cover (4) is air-permeable.

8. The casing according to claim 1, whose cover (4) is arranged as an air filter.
9. The casing according to claim 1, whose cover (4) consists of plastic.
10. The casing according to claim 1, whose recess (2) comprises a plurality of ventilation openings (3).
11. The casing according to claim 1, wherein a casing wall on which a component to be cooled is arranged, runs on the side opposite to the recess (2).
